THE NEW ZEALAND
JOURNAL OF AGRICULTURE.

VOLUME XXXII.

(January–June, 1926.)

INDEX.

A.

Abortion, contagious, in dairy herds, 148.
Abortion following bloating in cow, 364.
Agricultural education, higher, in Great Britain, 244.
Agricultural machinery, Australian, 72.
Agriculture, New Zealand, in past quarter-century, 88.
Allan, H. H.—Review of "Monograph on the New Zealand Beech Forests," 359.
Angora goats, 214.
Answers to inquiries, 66, 139, 214, 289, 363, 427.
Antepartum paralysis in ewes, 375.
Apiary, the (monthly notes), 56, 134, 208, 278, 355, 417.
Apricot-trees, fruiting of, 67.
Art of manuring in New Zealand, the, 1.
Aston, B. C.—
  A reconnaissance survey of pumice soils: Rotorua County, 365.
  Mineral elements in the feeding of stock, 78.
  The art of manuring in New Zealand, 1.
Atkinson, Esmond—Weeds and their identification: Bathurst burr, 104; caper-spurge, 404.
Ayrshire cattle at Ruakura (photo), 218.

B.

Baking-tests, 26.
Barry, W. C.—Diseases in flocks at lambing-time, 375.
Basic superphosphate, 214.
Bathurst burr, 104.
Beech forests, monograph on the New Zealand, 359.
Bees and fruit-tree spraying, 288.
Bees, moving of, 417.
Beet-sugar industry in Australia, the, 48.
Better-farming train in Victoria, the, 92.
Bone-chewing cows, 139.
Books received, 71, 426.
Botanical garden for New Zealand, a national, 255.
Box tests, butter, 325.
Bronze-beetle, the: Its habits and control as an orchard pest, 9.
Brown, F. C.—Poultry-keeping (monthly notes), 54, 131, 205, 275, 353, 419.
Butter-boxes made of foreign timber, 188.
Butter-box tests: Development of balanced construction to minimize breakage during transit, 325.
Butter, whey, manufacture of, 182.

C.

Calf-feeding, minerals in, 141.
Caper-spurge (*Euphorbia Lathyrus*), 404.
Case of leg lesions in ram hoggets, a, 408.
Cattle-dips, condition of, 33.
Cattle in New Zealand, classification of, 143.
Certificate-of-record lists, 41, 122.
Certificate-of-record system: Annual review for 1925, 152.
Cheese, processed, and the Irish market, 33.
Chemistry Section—Importation of fertilizers: Annual statistics, 1925–26 and 1924–25, 410.

Citrus-culture (monthly notes), 54, 131, 205, 275, 352, 416.
Citrus-culture: Variety and root-stock experiments at Tauranga, 219.
Clifton County, entry of stock into, 72.
Clover, subterranean, and lucerne, 290.
Clover, subterranean, in Australia, 40.
Cockayne, A. H.—
Control of weeds, the, 145, 316.
New Zealand agriculture: Its trend in the past quarter-century, 88.
Contagious abortion in dairy herds, 148.
Contagious mammitis in dairy cows, some observations on, 73.
Contagious stomatitis in lambs, 363.
Control of weeds, the, 145, 316.
Copper carbonate, dry-pickling of seed wheat with, 324.
C.O.R. closing list for year 1925, 198.
Cow with scab on teat, 140.
Cows, spayed, coming on heat, 68.
Cows with udder trouble and foot-rot, 66.

D.

Dairy Division—C.O.R. closing list for year 1925, 198.
Dairy instruction, farm, 242.
Danthonia grassland, 215.
Davidson, J. H.—Citrus-culture: Variety and root stock tests at Tauranga, 219.
Deem, J. W.—
Subterranean clover in Australia, 40.
The beet-sugar industry in Victoria, 48.
The better-farming train in Victoria, 92.
Dehorning of cattle, 412.
Destruction of tall couch: Experiment in Marlborough, 120.
Deterrent sprays for pear-midge: Further experiments at Henderson, 311.
Diseases in flocks at lambing-time, 375.
Dodder in clover and lucerne, control of, 363.
Dry-pickling of seed wheat with copper carbonate, 324.

E.

Earp, E. A.—The apiary (monthly notes), 56, 134, 208, 278, 355, 417.
Education, horticultural, for New Zealand, 36.
Eggs and egg-pulp in cold storage, 143, 426.
Electro-culture investigation, 172.
Entomology, economic, the progress of, in Australia and New Zealand, 173, 236.
Experiments on manuring of potatoes in Canterbury, season 1924–25, 258, 322.
Export of fruit, 1926 season: Conditions of Government guarantee and export regulations, 60.
Export of purebred dairy cattle in 1925, 165.

F.

Farm dairy instruction: The system explained, 242.
Farm poultry, 420.
Farm schools, winter, 284.
Farm, the (monthly notes), 49, 127, 201, 270, 348, 412.
Farmers' field-days, 181.
Feeding of stock, mineral elements in the, 78.
Fencing-posts, preservative treatment of, 282.
Fern-infested country, sickness in cattle on, 139.
Fertilizers, importation of, in 1925–26 and 1924–25, 410.
Fertilizers, importation of (quarterly return), 217.
Fields Division—The farm (monthly notes), 49, 127, 201, 270, 348, 413.
Flours, quality of, 93.
Fodders and supplementary forage crops for dairy-farmers, 189.
Forage crops and fodders for dairy-farmers, 189.
Forest and timber insects in New Zealand, 144.
Forest entomology, 172.
Forestry, insect groups associated with, 108.
Forestry League competition for juveniles, 362.
Foster, L. D.—Testing of New-Zealand-grown wheats, 26, 93.
Fowls with foot trouble, 139.
Foy, N. R.—The official seed-testing station: Record of operations for 1925, 340.
Fruit-culture—pome, citrus, and stone—in New Zealand, 283.
Fruit, export of, 1926 season: Guarantee and regulations, 60.

G.

Giant fescue, destruction of, 67.
Gill, D. A.—Notes on contagious abortion in dairy herds, 148.
Goats, Angora, 214.
Grapes or grape-vines, importation of, 216.
Grape-wine-making in small quantities, 34.
Grasses and clovers for hill country, 291.

Grassland reverting to fern, restoration of, 427.
Grassland top-dressing trials on hill country, 397.
Grasslands of New Zealand, the: Series II. The mid-west North Island hill country, 291.
Grass-mixture for bush-burn in Rakaunui district, 68.
Grass-seed from Australia, importation of, 71.
Greenwood, F. W.—
Destruction of tall couch in Marlborough, 120.
Liming and top-dressing experiments in Marlborough, season 1925–26, 186, 264.

H.

Hawken, Hon. O. J. (photograph), 126.
Hazel and walnut trees, 364.
Higher agricultural education in Great Britain, 244.
Hill country, grasses and clovers for, 291.
Hill-country grassland, top-dressing trials on, 397.
Hopkirk, C. S. M.—
A case of leg lesions in ram hoggets, 408.
Some observations on contagious mammitis in dairy cows, 73.
Horse with seedy toe, 141.
Horses with sore shoulders, 214.
Horticulture Division—Used motor-oil for orchard-spraying, 282.
Horticultural education for New Zealand: Institute of Horticulture report, 36.
Horticulture (monthly notes), 58, 136, 209, 279, 357, 421.
Hudson, A. W., and Ward, F. E.—
Experiments on manuring of potatoes in Canterbury, 258, 322.
Hyde, W. C.—
Horticulture (monthly notes), 58, 136, 209, 279, 357, 421.
Walnut-culture: Some notes on Hawke's Bay groves, 83.

I.

Importation of fertilizers: Annual statistics, 1925–26 and 1924–25, 410.
Importation of grapes or grape-vines, 216.
Importation of pedigree stock into Britain: Conditions for landing and form of application, 285.
Importation of produce from the United States, 412.
Infected area at Waitara, 197.
Inostemma genus, 381.
Insect groups associated with forestry, 108.
Inventions of agricultural interest, 71, 213, 347.
Irrigation farming, 129, 203.

K.

Kerosene-lamps for heating glass-houses, 428.
Koromiko experimental plots, 264.

L.

Lambing-time diseases in flocks, 375.
Leg lesions in ram hoggets, a case of, 408.
Lemon and orange variety tests at Tauranga, 220.
Lemon root-stock tests at Tauranga, 226.
Levy, E. Bruce—The grasslands of New Zealand: Series II. The mid-west North Island hill country, 291.
Limestone, ground, and burnt lime, 289.
Liming and top-dressing experiments in Marlborough, season 1925–26, 186, 264.
Liming and top-dressing of pasture at Winton Experimental Area: Results for 1925, 251.
Live-stock Division—Salt poisoning in pigs, 266.
Lucerne crop for ensilage, dealing with, 68.
Lucerne-growing: Notes for Canterbury and North Otago conditions, 15.
Lucerne inoculation, artificial cultures for, 66.

M.

Makgill, R. H.—Deterrent sprays for pear-midge, 311.
Mammitis, contagious, in dairy cows, 73.
Mammitis, gangrenous, in ewes, 377.
Manufacture of whey butter, 182.
Manuring in New Zealand, the art of, 1.
Marlborough, liming and top-dressing experiments in, 186, 264.
McCulloch, W. J.—Top-dressing of hill-country grassland: Trials in Wellington and southern Hawke's Bay districts, 397.
McGillivray, R.—
Liming and top-dressing of pasture at Winton Experimental Area, 251.
Top-dressing demonstration at Morton Mains, 392.

Meteorological Office (monthly weather records), 69, 142, 212, 287, 361, 425.
Metritis in ewes, 377.
Milk for human consumption, sale of, 72.
Milkers, tough, 67.
Miller, D.—
Insect groups associated with forestry, 108.
Parasites of the pear-midge (*Perrisia pyri*): First attempt at their establishment in New Zealand, 379.
The bronze-beetle, 9.
Mineral elements in the feeding of stock, 78.
Minerals in calf-feeding, 141.
Monograph on the New Zealand beech forests (review), 359.
Morton Mains, top-dressing demonstration at, 393.
Motor-oil, used, for orchard-spraying, 282.

N.

National botanical garden for New Zealand, a: Proposal by Institute of Horticulture, 255.
Neill, J. C.—
Oat-smut, 166.
Stinking-smut of wheat, 233.
New Zealand agriculture: Its trend in the past quarter-century, 88.
Notes on contagious abortion in dairy herds, 148.
Noxious-weeds clearing, 65.
Noxious weeds, control of, by insects, 236.
Noxious-weeds orders, 82, 310, 407.
Nuts, 280.

O.

Oat-smut: Survey and experimental work, season 1925–26, 166.
Oats and wheat, estimated yields of, 144.
Oats and wheat threshings, 284.
Occupation and utilization of land in New Zealand, 125.
Official seed-testing station, the: Record of operations for 1925, 340.
Ophthalmia, sheep with, 428.
Orange and lemon variety tests at Tauranga, 220.
Orchard, the (monthly notes), 52, 130, 204, 274, 351, 415.

P.

Parasites, internal, in lambs, 427.
Parasites of the pear-midge (*Perrisia pyri*): First attempt at their establishment in New Zealand, 379.
Patterson, T. H.—Forage and supplementary forage crops for dairy-farmers, 189.
Pear-midge, deterrent sprays for, 311.
Pear-midge parasites, 379.
Perennial rye-grass on hill country, 301.
Perry, W.—Wool-growing in New Zealand, 394.
Phosphorus poisoning in ewes, suspected, 290.
Pigs, hand feeding of young, 66.
Pigs, salt poisoning in, 266.
Pigs, staggery and paralytic condition in, 363.
Plant-bug attacking turnips, 378.
Platygaster, 381.
Pome, citrus, and stone fruit culture in New Zealand, 283.
Potatoes, experiments on manuring of, in Canterbury, 258, 322.
Potatoes, regulations regarding grading of, for sale in New South Wales, 288.
Poultry-keeping (monthly notes), 54, 131, 205, 275, 353, 419.
"Practical Bee-keeping," 279.
Preservative treatment of fencing-posts, 282.
Processed cheese and the Irish market, 33.
Produce, importation of, from United States, 412.
Progress of economic entomology in Australia and New Zealand, the, 173, 236.
Pruning of apple-trees, 415.
Pumice soils, survey of, 365.

R.

Rabbit districts, new, 72, 263, 360.
Rabbit-proof fencing district, new, 216.
Ragwort, destruction of, 215.
Reconnaissance survey of pumice soils, a: Rotorua County, 365.
Reginald MacKinnon prize, the, 217.
Regulations regarding the grading of potatoes for sale in New South Wales, 288.
Review, 359.
Rice as a poultry-food, 289.
Rice, W. H.—Citrus-culture (monthly notes), 54, 131, 205, 275, 352, 416.
Riddet, W.—Higher agricultural education in Great Britain, 244.
Rotorua County: Survey of pumice soils, 365.
Rules for certificate-of-record testing of purebred dairy cows: Current additions and amendments, 319.
Rust in pasture, and lambing, 378.
Rye-grass, perennial, on hill country, 301.

S.

Salt poisoning in pigs, 266.
Seasonal notes (monthly), 49, 127, 201, 270, 348, 413.
Seed-testing station, official: Record of operations for 1925, 340.
Seedy toe in horse, 141.
Sheep with ophthalmia, 428.
Shows, forthcoming, 70, 144, 364, 426.
Shows, forthcoming winter, 286.
Sickness in cattle on fern-infested country, 139.
Singleton, W. M.—
Butter-boxes made of foreign timber, 188.
Rules for certificate-of-record testing of purebred dairy cows: Current additions and amendments, 319.
Testing of purebred dairy cows: Annual review of the New Zealand C.O.R. system in 1925, 152.
Testing of purebred dairy cows (C.O.R. lists), 41, 122, 267.
Smith, J. W.—Manufacture of whey butter, 182.
Smut, oat, 166.
Smut, stinking, of wheat, 233.
Soil survey in Rotorua County, 365.
Soil treatment for Halcombe farm, 140.
Some observations on contagious mammitis in dairy cows, 73.
Spring Creek experimental plots, 186.
Standard metal-bound butter-box for export, 338.
Stinking-smut of wheat: II. Experimental results for season 1925–26, 233.
Stock, entry of, into Clifton County, 72.
Stock, pedigree, importation of, into Britain, 285.
Stomatitis (sore mouth) in lambs, 378.
Subterranean clover and lucerne, 290.
Subterranean clover in Australia, 40.

T.

Tall couch, destruction of, in Marlborough, 120.
Tallow, classification of, for export to Britain, 407.
Tank, galvanized-iron, reconditioning a, 82.
Testing of New-Zealand-grown wheats: Results for year 1925, 26, 93.
Testing of purebred dairy cows: Amended C.O.R. rules, 319.
Testing of purebred dairy cows (certificate-of-record lists), 41, 122, 198, 267.
Testing of purebred dairy cows: Review of the New Zealand certificate-of-record system in 1925, 152.
Thomson, G. M.—A national botanical garden for New Zealand, 255.
Thorp, J. H.—The orchard (monthly notes), 52, 130, 204, 274, 351, 415.
Tillyard, R. J.—The progress of economic entomology in Australia and New Zealand, 173, 236.
Tobacco-growing, 60, 138, 281, 358, 423.
Top-dressing and liming experiments in Marlborough, season 1925–26, 186, 264.
Top-dressing and liming of pasture at Winton Experimental Area, 251.
Top-dressing demonstration at Morton Mains, 393.
Top-dressing, nitrogenous, for pasture, 428.
Top-dressing on hill-country grassland: Trials in Wellington and southern Hawke's Bay districts, 397.

U.

Used motor-oil for orchard-spraying, 282.
Utilization of land in New Zealand, 125.

V.

Vagina, extrusion of, in ewes, 376.
Vaginitis in dairy herd, 140.
Vegetable-growing, 58, 136, 209, 279, 357, 422.

W.

Waitara, infected area at, 197.
Walnut and hazel trees, 364.
Walnut-culture: Some notes on Hawke's Bay groves, 83.
Ward, F. E., and Hudson, A. W.—Experiments in manuring of potatoes in Canterbury, 258, 322.
Ward, F. E.—
Dry-pickling of seed wheat with copper carbonate, 324.
Lucerne-growing: Notes for Canterbury and North Otago conditions, 15.
Ward, W. C.—Butter-box tests, 325.
Water-hyacinth in New Zealand, 412.
Weather records (monthly), 69, 142, 212, 287, 361, 425.
Weeds and their identification—
Bathurst burr, 104.
Caper-spurge, 404.
Weeds, control of, 145, 316.

Wheat and oats, estimated yields of, 144.
Wheat and oats threshings, 284, 424.
Wheat, dry-pickling of, with copper carbonate, 324.
Wheat-growing in Canterbury, 270.
Wheats, testing of New-Zealand-grown, 26, 93.
Whey butter, manufacture of, 182.
Wine-making in small quantities, 34.
Winton Experimental Area, liming and top-dressing of pasture at, 251.
Winter farm schools, 1926, 284, 362.
Womb, prolapse of, in ewes, 377.
Woodfin, J. C.—Grape-wine-making in small quantities, 34.
Wool-growing in New Zealand, 394.
Wright, W.—Processed cheese and the Irish market, 33.
